

M. TECH.
(SEM-II) THEORY EXAMINATION 2017-18
AIR AND NOISE POLLUTION & CONTROL

Time: 3 Hours

Total Marks: 70

Note: Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

- 1. Attempt all questions in brief.** **2 x 7 = 14**
- Define air pollution.
 - What do you mean by line and area source of air pollution?
 - Explain various types of air pollutants with examples.
 - Describe sampling.
 - Enlist the various devices used in air quality monitoring.
 - What is adsorption process?
 - Elaborate the effects of noise pollution.

SECTION B

- 2. Attempt any three of the following:** **7 x 3 = 21**
- Define pollution. Also give the classification of various types of pollutions in detail.
 - Describe AQS in detail.
 - Calculate effective stack height : (a) Physical stack is 220 m tall with 1 m inside dia, (b) Wind velocity is 2.5 m/s, (c) Air temp. is 22°C, (d) Barometric pressure is 1100 mb, (e) Stack gas velocity is 15 m/s, (f) Stack gas temperature is 140°C.
 - Explain the working principle of ESP with neat diagram
 - Explain Gaussian plume in detail.

SECTION C

- 3. Attempt any one part of the following:** **7 x 1=7**
- Describe wet scrubber along with diagram.
 - What are the various legal aspects for control of industrial air pollution?
- 4. Attempt any one part of the following:** **7 x 1= 7**
- Define Air (Prevention and Control of Pollution) Act. Discuss its Salient features.
 - 'Pollution, poverty and population growth, all three are interconnected.' Comment on this statement.
- 5. Attempt any one part of the following:** **7 x 1= 7**
- What is noise pollution? What are the sources of noise pollution? Also enlist its various impacts on environment as well as on human health.
 - Write short note on;
 - Particulate and gaseous contaminants
 - Vehicular pollution
- 6. Attempt any one part of the following:** **7 x 1= 7**
- Explain various plume behavior with neat diagram.
 - What are the various policies adopted in India for control of air pollution?
- 7. Attempt any one part of the following:** **7 x 1= 7**
- Explain different layers of atmosphere based on temperature and height.
 - Discuss various mathematical models related to dispersion and transport of air pollutants.
